## Sudden Shock Linked to Disease

Dr. Hamer found that every DISEASE originates from an unexpected shock experience. He established that such a sudden shock affects not only the psyche, but impacts at the same time (visible on a brain scan) the part of the brain that corresponds biologically to the specific trauma. Whether the body responds to the unexpected event with a tumor growth (cancer), with tissue degeneration, or with functional loss, is determined by the exact type of conflict shock. So far, Dr. Hamer has been able to confirm these discoveries with over 40,000 case studies. Since HEALING can only occur after the conflict has been resolved, German New Medicine therapy focuses on identifying and resolving the original shock.

Dr. Hamer's research began in 1979 after the tragic loss of his son Dirk. Shortly after Dirk's death, Dr. Hamer was diagnosed with testicular cancer. Since he had never been seriously ill, he assumed that the development of his cancer could be directly related to the traumatic event he had experienced. At that time Dr. Hamer was head internist of a cancer clinic at the University of Munich in Germany. There, he began to systematically study his patients regarding the causes, development, and healing process of their cancers. What he discovered was revolutionary!

Dr. Hamer is the first to prove scientifically that cancer for example, is not - as previously thought- a senseless proliferation of deadly cancer cells rather part of a Significant Biological Special Program (SBS) of Nature that has been successfully practiced for millions of years of evolution.

German New Medicine offers a completely new understanding of what we commonly call "diseases". By understanding the Five Biological Laws that Dr. Hamer discovered, we liberate ourselves from the fear and panic that often come with the onset of an illness. Truly, a gift to humanity!

Since 1988, Dr. Hamer's findings have been tested and verified by many physicians and professorial associations through signed documents (see website <http://germannewmedicine.ca/documents/welcome.htm/> ).

## Insights from Ranae

**Ranae Johnson, founder of Rapid Eye Technology and owner of the Rapid Eye Institute**

*The thing  
always  
happens that  
you really  
believe in;  
and the belief  
in a thing  
makes it  
happen.*

*Frank Loyd  
Wright*

The law of the universe is balance. Many of our Master Rapid Eye Technicians experienced bringing their lives into balance in this last training held at the Institute. We are excited about the quality of technicians that are being attracted to the RET module. The Master Level Class and the Enhanced RET Class were held back to back and produced a very high energy frequency. Everyone reported having a very enlightened experience. It is our intention that all of our RET techs experience these two classes.

Our mission on Earth is to remember who we really are. As we remember who we are, we will awaken and assist others to remember who they are. This effect will grow and grow and spread upon the land to go to the confused people across the Earth. As more and more people remember that they are a child of God and are loved and honored dearly, the energy of the Earth will lift into a higher frequency and a higher level of existence.

We are all creative beings and a part of a mystical, magical creation. We can create personal power and love and eventually anything we wish. We love and appreciate your passion and enthusiasm for Rapid Eye and our prayers are with you as Rapid Eye Technology spreads over land.

### Did You Know...

- If you are a Rapid Eye Technician, you can use RET's website as your own
- On the RET Directory you can type as many testimonials about yourself as you want
- Submitting articles for RET's Newsletters is a great way to get extra advertising
- As a RET Tech, you can use Heartway Foundation to do fund raisers
- By attending the Master RET Course, you can get wonderful marketing skills
- In the Enhanced RET Course you can learn how to work with diseases and organs
- You can always come back through certification as a new student for the hours and sessions or staff for \$50. It counts as continuing education

## Lessons from an Oyster

There once was an oyster  
 Whose story I tell,  
 Who found that some  
 sand  
 Had got into his shell.  
 It was only a grain,  
 but it gave him great  
 pain.  
 For oysters have feelings  
 Although they're so  
 plain.  
 Now, did he berate  
 the harsh workings of  
 fate  
 That had brought him  
 To such a deplorable

state?  
 Did he curse at the  
 government,  
 Cry for election,  
 And claim that the sea  
 should  
 Have given him protection?  
 'No,' he said to himself  
 As he lay on a shell,  
 Since I cannot remove  
 it,  
 I shall try to improve it.  
 Now the years have  
 rolled around,  
 As the years always do,  
 And he came to his ultimate

Destiny - stew.  
 And the small grain of  
 sand  
 That had bothered him  
 so  
 Was a beautiful pearl  
 All richly aglow.  
 Now the tale has a  
 moral,  
 for isn't it grand  
 What an oyster can do  
 With a morsel of sand?  
 What couldn't we do  
 If we'd only begin  
 With some of the  
 things  
 That get under our  
 skin.

## Upcoming Courses and Workshops

### **Alchemists: Turning Lead into Gold**

October 5-12, 2009

9am - 6pm daily

Harry Myers Community Center

815 E. Washington

Rockwall, TX 75087

Tuition is \$1800, \$200 non-refundable deposit to  
 hold your place in class

Registration: Call the Living Well Dallas Office

At 972-930-0260 to register

For any questions

Contact Suzan at

suzan@livingwelldallas.com

### **Energy Psychology**

#### **Clearing Your 12 Chakras Workshop**

Decoding the Sacred Messages held in

Your Energy Centers

September 19- 24, 2009

Mesa, AZ

Tuition is \$1200

Registration: Call Sharlene Young at

503-851-4574

For any questions contact Sharlene at

chakraclearing@comcast.net

## Sudden Shock Linked to Disease

(Continued from page 1)

At the core of each RET session, we are focusing and directing the client to go to the cause, to what ever the stress or disease is, to resolve what happened , and then re-frame to create what they would rather have.

Dr. Hamer's research is most exciting, as it documents physical proof of what hundreds of RET clients have experienced from their sessions. Elizabeth Olsen was diagnosed with colon cancer in 2000, when she underwent surgery, there was no cancer to be found! Her RET sessions focused on going to the cause, processing the trauma, resolving the conflict, and creating health, which she did. Many others have experienced similar results from their RET sessions.

From Years of research with clients, utilizing Rapid Eye Technology, and the human energy systems, Sharlene Young has developed healing and clearing techniques for specific diseases and other conditions. This research is an on going healing series called "*Clearing your 12 Chakra's with Rapid Eye Technology*", by Sharlene Young.

Healthy Cell Growth is a **NEW** Chakra RET session that has been designed from this research. This session identifies the very first time a sudden shock trauma experience was imprinted into the system, creating the unhealthy or cancer cells. The process script utilizes medical terminology, emotions, beliefs, and patterns to release the creation of the unhealthy cell growth. Reframing and resolving the exact conflict that created the original pattern activates and creates a matrix shift in the DNA / RNA for a new blueprint of healthy cell growth for the body to now follow.

## Seeing More with Rose-Colored Glasses

The following article might explain why people feel better after an RET session in which their eyes are forced to expand the visual perceptual fields - the exact opposite expressed in the article. In other words, if mood can affect the visual perceptual field, can expanding the visual perceptual field with RET wand work and eye movement affect mood? I think the correlation may be reciprocal.

**-Joseph Bennette**

A University of Toronto study provides the first direct evidence that our \*mood literally changes the way our visual system filters our perceptual experience\* suggesting that seeing the world through rose-colored glasses is more biological reality than metaphor.

(Continued on page 5)

## Seeing More with Rose-Colored Glasses

"\*Good and bad moods literally change the way our visual cortex operates and how we see\*," says Adam Anderson, a U of T professor of psychology.

"Specifically our study shows that \*when in a positive mood, our visual cortex takes in more information, while negative moods result in tunnel vision\*. The study appears in the *Journal of Neuroscience*./

The U of T team used functional magnetic resonance imaging to examine how our visual cortex processes sensory information when in good, bad, and neutral moods. They found that donning the rose-colored glasses of a good mood is less about the color and more about the expansiveness of the view.

The researchers first showed subjects a series of images designed to generate a good, bad or neutral mood. Subjects were then shown a composite image, featuring a face in the center, surrounded by "place" images, such as a house. To focus their attention on the central image, subjects were asked to identify the gender of the person's face. When in a bad mood, the subjects did not process the images of places in the surrounding background. However, when viewing the same images in a good mood, they actually took in more information - they saw the central image of the face as well as the surrounding pictures of houses. The discovery came from looking at specific parts of the brain - the parahippocampal "place area" - that are known to process places and how this area relates to primary visual cortical responses, the first part of the cortex related to vision. Images from the experiment are at the Affect & Cognition Lab <<http://aclab.ca>> website.

"Under positive moods, people may process a greater number of objects in their environment, which sounds like a good thing, but it also can result in distraction," says Taylor Schmitz, a graduate student of Anderson's and lead author of the study. "Good moods enhance the literal size of the window through which we see the world. The upside of this is that we can see things from a more global, or integrative perspective.

The downside is that this can lead to distraction on critical tasks that require narrow focus, such as operating dangerous machinery or airport screening of passenger baggage. Bad moods, on the other hand, may keep us more narrowly focused, preventing us from integrating information outside of our direct attentional focus."

Christine Elias University of Toronto
